PROFILE

Second-year B.Tech student in Computer Science and Technology at JIS College of Engineering, interested in AI/ML and full-stack development. I enjoy building practical projects that combine web applications with AI, document processing, and useful everyday tools. My project and hackathon experience has helped me practise working across frontend and backend components, integrating APIs, and collaborating under time limits.

TECHNICAL SKILLS

Programming: Python, C, C++, JavaScript, SQL
Web Development: React.js, HTML, CSS, REST APIs, JSON
AI & Document Processing: Generative AI, LLM prompting, OCR / Document AI, speech and audio AI
Backend & Data: FastAPI, Node.js, Express, MySQL, Firebase
Tools & Other: Git, GitHub, VS Code, Postman, Linux CLI, basic GIS / spatial analysis

PROJECTS

MedicalAI — AI-Assisted Clinical Intelligence & Preliminary Triage

Technologies: React, Vite, Node.js, Express, Firebase, Google Gemini API

- Worked on a healthcare web application with patient and doctor portals and AI-assisted preliminary triage.
- Included multilingual interaction, QR-based patient information, medicine reminders, and emergency SOS location sharing.
- Deployed a demo on Render and focused on making key workflows accessible across web and mobile.

Link: https://medicalai-1.onrender.com/

NLAMS AI Engine — Land Acquisition & Management

Technologies: Python, FastAPI, OCR / Document AI, Shapely, GIS, ReportLab, Gemini

- Developed API workflows for geometry verification, grievance triage, and award-summary generation.
- Worked on cadastral geometry checks and document-processing features to support land-record validation.

QR Nova — QR Code Studio

Technologies: JavaScript, HTML, CSS

- Built a responsive QR code generator for URLs, text, Wi-Fi, email, phone numbers, and SMS.
- Added options to customize QR codes for different use cases.

VoiceShield — Voice-Cloning & Fraud Detection Prototype

Technologies: Python, speech/audio AI, FastAPI, React

- Contributed to a hackathon prototype exploring ways to identify synthetic or manipulated voice audio.
- Worked on the application and API side of a concept aimed at helping flag suspicious voice interactions.

StudentOS — AI Academic & Career Copilot

Technologies: React, Python, MySQL, REST APIs

- Worked on an EdTech concept for academic tracking, skill-gap analysis, and placement preparation.
- Explored student progress dashboards and recommendation workflows for learning and career milestones.

EDUCATION

B.Tech, Computer Science and Technology — JIS College of Engineering, Kalyani, West Bengal | 2025–Present | 2nd Year
Class XII (CBSE) — PM SHRI Kendriya Vidyalaya Kanchrapara No. 2 | 73.0%
Class X (CBSE) — PM SHRI Kendriya Vidyalaya Bandel | 86.6%

CERTIFICATIONS

- RAG Masters — Euron
- Python (Basic) — Certification
- Generative AI: Basic to Advance — Certification

HACKATHONS & ACHIEVEMENTS

- **Smart India Hackathon (SIH) 2026:** Worked on VoiceShield; the team was shortlisted 11th among 110+ teams, with a reported score of 92/100.
- **Hackathon experience:** MSME Hackathon 2026, HACKNEX 2.0, Crazy Builds, and JISTECH 2026.

LANGUAGES

English (Proficient), Hindi (Native), Bengali (Conversational)
