

ARYAN YADAV

ASPIRING AI / ML ENGINEER & FULL-STACK DEVELOPER

- Address: Bandel, West Bengal • Phone: +91 6289492367 • Email: uiaryanyadav1109@gmail.com
• LinkedIn: [linkedin.com/in/aryan-yadav-dev01](https://www.linkedin.com/in/aryan-yadav-dev01) • GitHub: github.com/uiaryanyadav1109-dev

CAREER OBJECTIVE

Aspiring AI/ML Engineer pursuing a Bachelor of Technology in Computer Science and Technology at JIS College of Engineering. Focused on Artificial Intelligence, Machine Learning pipelines, Document AI, and scalable full-stack web applications. Proven hackathon competitor across SIH 2026, MSME 2026, and HACKNEX 2.0 with practical expertise in building high-impact, production-grade prototypes under strict timelines.

EDUCATION

B.Tech — Computer Science and Technology (CST)

2025 – Present

JIS College of Engineering, Kalyani, West Bengal (2nd Year, 3rd Semester)

Class XII (CBSE) — PM SHRI Kendriya Vidyalaya Kanchrapara No. 2

Score: 73.0%

Class X (CBSE) — PM SHRI Kendriya Vidyalaya Bandel

Score: 86.6%

TECHNICAL SKILLS

LANGUAGES

Python, C, C++, JavaScript (ES6+), SQL

AI & DATA SCIENCE

Speech/Audio AI, Document AI, OCR, Deep Learning basics

WEB DEVELOPMENT

React.js, HTML5, CSS3, REST APIs, JSON

DATABASES

MySQL, Relational Schema Design, Optimization

GENERATIVE AI

LLM Prompt Engineering, Summarization Pipelines

TOOLS & DEVOPS

Git, GitHub, VS Code, Postman, Linux CLI

FEATURED PROJECTS

VoiceShield — AI-Powered Voice Cloning & Fraud Defense

SIH 2026

Frontend & Application Developer

Tech: Python, Speech AI, Deep Learning Models, FastAPI, React.js

- Architected an anti-fraud security engine designed to detect synthetic voice cloning and deepfakes across enterprise banking telecommunication streams.
- Implemented acoustic feature extraction capturing synthetic vocal artifacts, replay cues, and spectral anomalies for real-time authentication scoring.
- Constructed low-latency streaming endpoints to ensure fraud prevention alerts execute within sub-second verification windows.

StudentOS — Unified AI Academic & Career Orchestration Platform

MSME Hackathon 2026

Full-Stack Developer

Tech: Python, React.js, MySQL, RESTful APIs, Git

- Created a unified EdTech ecosystem supporting students across academic tracking, skill-gap analysis, and tailored placement preparation workflows.
- Implemented intelligent recommendation logic mapping student progress directly to relevant internship tracks and project milestones.
- Structured normalized MySQL relational schemas and responsive React dashboard interfaces with multi-role authentication.

AuraNotes — Smart Web Note Organization Suite

Personal Project

Frontend Engineer

Tech: React.js, JavaScript (ES6+), HTML5, CSS3, Modern State Management

- Engineered a responsive, web-based platform tailored for intuitive note organization, using modern front-end architectures to establish smooth real-time utility.
- Optimized client-side state handling and component rendering hierarchies for high-speed cross-device user experiences.

FEATURED PROJECTS (CONTINUED)

NLAMS AI Engine — Land Acquisition & Management System

HACKNEX 2.0

AI & Backend Engineer

Tech: Python, Document AI / OCR, GIS Integration, Computer Vision, MySQL

- Engineered an enterprise-grade processing engine streamlining land valuation workflows, grievance triage automation, and cadastral geometry analysis.
- Integrated Document AI pipelines and OCR mechanisms to parse dense government archives, boundary deeds, and cadastral mapping registries.
- Accelerated institutional verification speeds by replacing manual paperwork audits with automated validation routines.

Saral — AI Document Simplification & Synthesis Engine

Crazy Builds

GenAI & Full-Stack Engineer

Tech: Python, Generative AI / LLMs, Prompt Engineering, React.js, Tailwind CSS

- Built an accessibility-first engine transforming complex legal, financial, and bureaucratic documentation into clear, plain-language summaries and action items.
- Designed structured prompt pipelines to reliably extract crucial deadlines, fiscal liabilities, and compliance clauses with high fidelity.
- Delivered a responsive web interface prioritized for accessibility guidelines and rapid parsing throughput.

HACKATHON EXPERIENCE

Smart India Hackathon (SIH) 2026

Lead AI & Backend Developer

- Engineered the core VoiceShield prototype, establishing high-accuracy synthetic audio detection models to protect institutional banking calls against fraud.
- Built high-throughput backend services capable of handling dynamic audio stream ingestion and instant risk telemetry.
- Delivered the solution in a nationwide sprint, presenting technical benchmarks to judging panels.

MSME Hackathon 2026

Full-Stack Engineer

- Architected the complete StudentOS software suite, linking responsive UI views with performant MySQL database management schemas.
- Implemented student skill-gap tracking logic, automated milestone generation, and role-based data isolation.
- Successfully defended product architecture and operational feasibility in final round evaluation presentations.

HACKNEX 2.0

AI & Systems Engineer

- Developed the core NLAMS processing engine, integrating intelligent OCR pipelines for automated land title and cadastral map verification.
- Optimized spatial and attribute matching algorithms to detect boundary overlaps and validation anomalies.
- Conducted live architecture demonstrations and responded to technical deep-dive evaluations by industry judges.

Crazy Builds

Frontend & Backend Engineer

- Engineered end-to-end full-stack modules for Saral, integrating LLM summarization endpoints with dynamic React front-end components.
- Collaborated in fast-paced development cycles to perform rapid debugging, API optimization, and unit testing under strict deadlines.

JISTECH 2026

Frontend & Backend Engineer

- Developed dynamic frontend and backend modules for the core competition framework, streamlining cross-system integrations.
- Collaborated within a multidisciplinary team to deliver a fully functional product under tight timelines.

AREAS OF INTEREST

- ▶ Artificial Intelligence & Machine Learning
- ▶ Document AI & Voice Biometric Security
- ▶ Data Structures & Algorithmic Problem Solving
- ▶ Full-Stack Web Architectures & REST APIs
- ▶ Relational Database Management Systems

SOFT SKILLS & LANGUAGES

- ▶ **Soft Skills:** Analytical Thinking, Leadership, Rapid Prototyping, Technical Communication
- ▶ **Languages:** English (Prof.), Hindi (Native), Bengali (Conversational)

I hereby declare that the information furnished above is true and correct to the best of my knowledge and belief.

Place: Bandel, West Bengal
